COMPANY

INTRODUCTION

Ramo AB is located in the south of Sweden. The company founded in 1998 by Jonny von Rainals. The experience from production is well know in the company. Ramo history started in a car garage in 1991 as most of the companies in this region do. At the time company was named Rama Production. This company was started by Jonny von Rainals and a friend of his. Already from the beginning there where production to different customers and end user such as Volvo, ABB, Atlas Copco.

Logistics centre for machined products

Today Ramo is located in Sweden, China, Hungary in there own regime. There are more than 1200 productions plants that are serving the logistics centres all over the world in the "Ramo Group".

The base in long experience

With big knowledge and long experience as the base, we have created big confidence among purchasers in many industrial sectors, which has lead to supply -ng customers with small special parts up to big wide projects involved with mass production as the result.

GROUP

Quality policy:

QUALITY SS-EN ISO 9001:2000

Ramo's quality idea is to supply the customer with special parts according to drawings and demand. The parts are manufactured by contracted partners and are quality approved by each supplier with Internal or external requested equipment. Ramo shall always make a complete analysis of all contracts so that the customer is completely satisfied.

Your demands - Our challenge.

When we decide which manufacturer will produce each part, we always choose those based on our customers demand.

It's very important for us that our manufacturer understands the product and will be sure to fulfil our customers demand.

There are in our group all types of manufacturers with different kinds of certifications. Together with you we will follow up every contract so we reach the best production.
